

WORK EXPERIENCE

Riseup Labs	Dhaka, Bangladesh
<i>Software Engineer</i>	Jan, 2026 - Present
- Designed and implemented API-driven billing systems with Stripe subscriptions, supporting scalable user and payment management. - Optimized AI prompts for an AI SaaS product, improving accuracy and response efficiency. - Joined <i>Neoscoder (Akij Venture Group)</i> as an augmented resource, contributing to RTM backend systems. - Optimized distributed systems handling data for 1.2M+ outlets, improving routing efficiency and reducing processing time. - Maintained and debugged distributed microservices architecture, improving system reliability and production stability. - Performed root cause analysis (RCA) to improve reliability and reduce downtime.	
Betteremart	Chittagong, Bangladesh
<i>Lead Developer</i>	Nov, 2024 - Dec, 2025
- Led development of a scalable e-commerce system, designing modular architecture and API-driven services for payments, POS, and analytics. - Built responsive, WCAG-compliant UI for web and mobile, improving user engagement. - Designed and integrated secure APIs for payment gateway, POS, and analytics systems, improving performance by 20%. - Led architecture decisions for scalable systems, ensuring maintainability and efficient system design across the platform. - Implemented CI/CD pipelines for continuous deployment and faster feature releases.	
SystemSage Solutions Sdn. Bhd	Kuala Lumpu, Malaysia
<i>Software Developer (Remote)</i>	Oct, 2023 - Oct, 2024
- Developed IoT-based scalable systems using Node.js and Firebase, leveraging cloud-native architecture for real-time operations. - Built real-time dashboards with Tailwind CSS and Material UI principles for improved data visualization. - Applied AI-driven analytics and microservices architecture for predictive farming, increasing yield by 15%. - Designed and deployed cloud architecture on AWS IoT Core and Azure, enabling scalable deployments and CI/CD-driven delivery.	

SKILLS

- Programming Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend:** React.js, Next.js, Vue.js | Styling & UI: Tailwind CSS, Material UI, Framer Motion
- Backend:** Node.js, Express.js, Prisma ORM, RESTful APIs, GraphQL, WebSockets, Microservices Architecture
- Database & Caching:** PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Redis
- Collaboration & Tools:** Git, GitHub, Gitlab, Pixel-perfect Figma-to-React, CI/CD (Jenkins, Vercel, Netlify), Docker

PROJECT

Smarthires

AI-Powered Hiring Platform (2025): Developed an AI-driven recruitment system using Next.js, TypeScript, Supabase, Nest.js, Vercel, and OpenAI API, reducing recruitment steps by 60%. The platform features AI-based CV parsing (98% accuracy), custom assessments, bulk email automation, and intelligent candidate ranking to streamline the hiring process.

kumira Guptachara

Full-stack web application built using React.js, Next.js, Express.js, and MongoDB, featuring role-based authentication, POS integration, secure payment gateway, and Cloudflare optimization for improved performance and security.

EDUCATION

UCSI University Kuala Lumpur	Sept, 2020 - Aug, 2023
Bachelor’s of Computer Science (Hons) Mobile Computing and Networking	

LEADERSHIP & RESEARCH CONTRIBUTION

- Treasurer**, IEEE Computer Science Club (UCSI)
- Logistics Team Head**, Student Association of Bangladesh (UCSI)
- Co-Author, Research Publication: “*An IoT-Based Smart Farming Solution for Sustainable Agriculture*”, accepted at **GEn-CITY 2024**, Malaysia.
- First Author, Book Chapter: Contributed to “*Digital Transformation: A Way Forward*” with a chapter on the role of Internet of Everything (IoE) in business and economic growth.
